MXTOP 303

**Order and compactness
in large environments.**

www.vdm.it

MXTOP. The line
of trolleys **which**
grants high order
and safety standards
to the **operators in the**
professional cleaning
sector.

It is a line designed and realized for the Operators
requiring a multifunctional trolley well structured so
that all the necessary tools are always at hand.

Each model is ergonomic, handy and functional, most
suitable for the professional use, specifically in large
environments.

A compact and functional
design so that everything
is always at hand.

The structure has been designed to optimize its overall
dimensions. The great compactness grants simple
handling and practicality and the linear design gives
a professional image both to the trolley and
to the Operator.

The robustness of the materials, the central and side
doors made of polycarbonate grant stability when the
trolley is fully loaded.

Everything in order thanks to **unique details.**

The **innovative solutions** together with the ergonomic design optimize and **simplify the daily work.**
